

Il piatto Segmento viene fornito con la finitura sui quattro lati. Il piatto può essere rifilato in utenza per meglio adattarsi al contesto installativo: in questo caso si precisa che la zona rifilata perde la finitura e si consiglia pertanto di posizionare i lati rifilati contro parete. Per le rifilature si raccomanda di attenersi alle indicazioni riportate nel manuale tecnico.

Segmento shower tray is supplied with all four sides finished. The shower tray can be trimmed to size during installation in order to adapt it to the area. In this case the trimmed area loses its finish and should therefore be placed against the wall. For trimming areas we recommend to follow instructions reported on technical manual.

Altezza piatto / Tray height	25/26 mm
Diametro scarico / Waste diameter	90 mm
Copripiletta cromata / Waste cover chrome	inclusa / included

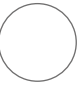

Il piatto Segmento è fornito completo di kit piletta di scarico extra piatta e copripiletta in acciaio inox.

Attenzione
Se il piatto viene installato su pavimento già piastrellato, sostituire la malta con la schiuma stesa in modo uniforme su tutta la superficie di appoggio del piatto.

Attention
If the shower tray is installed on a tiled floor, replace the mortar with foam, spreading it evenly over the entire surface of the shower tray.

Manutenzione e pulizia / Maintenance and cleaning

Per la pulizia ordinaria, utilizzare panni morbidi e detergenti liquidi neutri non abrasivi. Non usare panni con fibre sintetiche, spugne abrasive, spugne con fili metallici, detersivi solidi e liquidi contenenti abrasivi, alcool, acidi di uso domestico, acetone o altri solventi perché possono intaccare la superficie.

Evitare la formazione di depositi calcarei con la pulizia periodica. Dopo la pulizia sciacquare bene con acqua per eliminare definitivamente i residui del prodotto detergente. Nel caso di un forte deposito calcareo si consiglia una spugna leggermente abrasiva.

Macchie persistenti o residui di sporco conseguenti alla posa, possono essere rimossi mediante l'utilizzo di gomma per cancellare bianca.

For standard cleaning, use soft cloths and neutral liquid detergents that are not abrasive. Do not use synthetic fibre cloths, scouring pads, metal pads, abrasive detergents - liquid or solid - alcohol, acids for domestic use, acetone or other solvents, which can damage surfaces.

Avoid limescale deposits with a regular cleaning routine. After cleaning, rinse thoroughly with clean water to remove any detergent residue. In case of limescale deposit, use a slightly abrasive scouring pad.

Persistent stains or dirt residues resulting from installation operations can be removed using a white eraser.
